Blackline Masters – All books written by Dave Collins	Tick	Cost	Total
Authoring and Multimedia - ** NEW IST COURSE ** This set of Blackline masters has been designed to teach the option topic Authoring and Multimedia. The key software used is Flash and PowerPoint, and the accompanying CD has a stack of QuickTime movies that will teach your students how to use Flash. Relevant sections of the core has also been integrated into this unit. 30 pages	<input type="checkbox"/>	\$80.00	
Gamemaker – Software Design - ** NEW IST COURSE ** Programming made easy! Gamemaker is a new programming language that allows to students to design games in an easy to use graphical environment. This book has been designed for the Software Design section of the IST course, but could also be used with SDD students. All of the practical lessons are recorded on the accompanying CD. 25 pages	<input type="checkbox"/>	\$80.00	
Internet and Website Development - ** NEW IST COURSE ** Students learn how to create websites using Dreamweaver and study the relevant background on how and why the Internet works. This book has also been designed for the IST course and includes video tutorials enabling students to learn at their own pace. As with all of the books designed for the IST course, relevant content form the core is included. 31 pages.	<input type="checkbox"/>	\$80.00	
Practical Project ideas for IPT This book contains five short projects that can be used to teach the IPT course in an interactive manner. Students work on a project of 2-3 weeks in length. As they work through their projects, theoretical aspects of the IPT course are introduced to help achieve their task. 42 pages	<input type="checkbox"/>	\$50.00	
Introduction to Python Programming Python is an object-oriented language that has been designed with beginners in mind. Students can quickly create simple programs similar to BASIC, but the language has all the power of C++ and some great graphical libraries available. 24 pages	<input type="checkbox"/>	\$50.00	
Digital Logic Dave Collins has developed a practical unit of work to cover the Electronic Circuits component of The Software Developer’s View of the Hardware option topic. Rather than tell students about how different gates work, let them discover it themselves with this self-paced set of practical lessons. 22 pages.	Windows <input type="checkbox"/> Mac <input type="checkbox"/>	\$50.00
